

A High Energy Full Feed, Formulated for Working Horses

- **Dunstan Salute** is a high energy full feed, formulated for racehorses and utilising a combination of energy sources. This highly palatable, lightly molassed muesli includes cooked cereal grains, super fibres and vegetable oil to meet the energy demands of the working horse.
- Dunstan Salute utilises extrusion technology in an Oat free diet, with majority of the cereal portion provided as Extruded Barley and Extruded Maize. The extrusion process provides these grains in a highly digestible form which is less likely to cause digestive upsets as a result of excessive fermentation in the caecum and hindgut.
- **Vegetable Oil** provides an additional calorie source in the equine athlete to boost calorie density of the ration.
- Selenium and elevated levels of Vitamin E are included as key antioxidants, working together to maintain normal muscle function and reduce damage associated with oxidative stress.
- The addition of a live yeast aids digestion and will assist in maintaining an optimum hind gut pH, therefore contributing to the overall health of the intestinal eco system of the horse.
- Minerals are provided as Glycinate Organic Trace Minerals resulting in improved bio-availability. This ensures maximum feed and nutrient utilisation, also aiding development of the natural immune system.
- Chromium Yeast is included as an aid to overall energy utilisation and as an agent to help reduce lactic acid accumulation, a factor associated with muscle fatigue.

FEEDING RECOMMENDATIONS		
Amounts per horse per day when offered as the full feed		
Light Work	2.5kg - 3kg	
Moderate Work	3.0kg - 4kg	
Hard Work	4.0kg - 6kg	

FEEDING NOTES

- The recommended feeding rates for **Dunstan Salute** are based on a 500kg horse and are guidelines only. Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- Ensure adequate fibre intakes by providing 1 %-1.5% per day of the horse's body weight as chaff, hay, **Dunstan Betabeet/Sugarbeet** or pasture (on a Dry Matter basis).
- It is advisable to split the daily hard feed into at least two feeds, preferably 3-4, but feed no more than 2.0 kg of **Dunstan Salute** per meal.
- Always introduce a new feed gradually over a period of 7 10 days, working up to the
 desired feed intake, taking into consideration body condition and work level.
- Always ensure the horse has access to clean drinking water.
- High Copper levels in **Dunstan Salute** make it unsuitable for feeding to sheep.

INGREDIENTS:

Bran and Pollard, Extruded Barley, Extruded Maize, Soya Hull Pellets, Molasses, Lupins, Steam Flaked Maize, Vegetable Oil, Lupins, Peas, Sunflower Seeds, Limestone, Salt, Di-Calcium Phosphate, Magnesium Oxide, Chromium, Lysine, Live Yeast, Vitamin E, Pan Apple, Vitamins and Minerals

Typical Analysis (Dry Matter Basis)

Crude Protein	14.5 %
Crude Fibre	9.0 %
Crude Fat	10.0 %
Energy DE	15.5 MJ/Kg

Nutrient Composition – typical analysis per kilo of Dunstan Salute (as Fed)

Crude Protein	130g
Lysine	7.5g
Ćalcium	9g
Phosphorus	5g
Chloride	11g
Sodium	6g
Potassium	10g
Magnesium	3g
Iron	200mg
Zinc (Organic)	130mg
Manganese	100mg
Copper (Organic)	50mg
Cobalt	.6mg
lodine	1.2mg
Selenium	.5mg
Vitamin A	10000
Vitamin D	1000iu
Vitamin E	320iu
Vitamin K	2mg
Thiamine B1	6mg
Riboflavin B2	6mg
Pyridoxine B6	5mg
Vitamin B12	50mcg
Niacin	20mg
Pantothenate	10mg
Biotin	280mcg
Folic Acid	1.5mg
Choline	650mg
Chromium	1mg

Heat stable Vitamins added at time of manufacture.
