SPEEDFEED®

Dunstan Speedfeed® is a complete Racehorse feed which provides for the nutrient requirements of Racehorses in full work.

- **Dunstan Speedfeed®** is formulated using a highly palatable blend of cereals including **Oats, Steam Flaked Maize, Steam Flaked Barley**, plus **Lupins, Sugarbeet, Sunflower Seeds, Vegetable Oils**, and a **Vitamin and Mineral pellet**.

- **Oats** are a highly digestible grain for horses and as they are combined with **Maize** and **Barley** in their heat-treated form, **Dunstan Speedfeed®** provides a **digestible and safe** way to feed calorie-dense grains.

- Utilising the **'super fibre' sugarbeet** as an ingredient is an ideal way to contribute both calories and **optimise digestive health**.

- The higher inclusion level of **Vegetable Oil** in **Dunstan Speedfeed®** provides a further alternative calorie source to support the energy requirements of the Racehorse.

- The high level of **Natural Vitamin E** combined with the highly **bio-available Organic Selenium** assist to **maintain normal muscle function** and together act as **antioxidants to protect body tissues from oxidative stress**.

- The addition of a **live yeast** aids digestion and will assist in maintaining a more **optimal hindgut pH**, therefore contributing to overall **health of the intestinal ecosystem** of the horse. **Chromium** is included in **Dunstan Speedfeed®** which assists in **reducing the build-up of lactic acid** in horses undertaking strenuous workloads.

INGREDIENTS:

Oats, Steam Flaked Maize, Steam Flaked Barley, Wheat Pollard, Extruded Soya Meal, Lupins, Soya Hulls, Sunflower Seeds, Sugarbeet, Vegetable Oil, Molasses, Salt, Lysine, Di-Calcium Phosphate, Magnesium Oxide, Minerals & Vitamins, Live Yeast, Organic Chromium & Selenium.

Typical Analysis (Dry Matter Basis)

• Crude Protein.....	14.0 %
• Fat.....	10.0 %
• Fibre.....	8.0 %
• Salt.....	1.5 %
• Energy DE.....	15.5 MJ/Kg

Nutrient Composition – per kilo of Dunstan Speedfeed® (as fed)

• Crude Protein.....	126 g
• Calcium.....	10.0 g
• Phosphorus.....	4.0 g
• Sodium.....	4.5 g
• Chloride.....	8.5 g
• Potassium.....	9.0 g
• Magnesium.....	2.5 g
• Iron.....	240 mg
• Zinc (Organic).....	100 mg
• Manganese.....	75 mg
• Copper (Organic).....	40 mg
• Cobalt.....	0.6 mg
• Iodine.....	1.0 mg
• Selenium (Organic).....	0.45 mg

• Vitamin A.....	10,000 i.u.
• Vitamin D.....	1,000 i.u.
• Vitamin E.....	500 mg
• Vitamin K.....	2 mg
• Thiamine B1.....	6 mg
• Riboflavin B2.....	6 mg
• Pyridoxine B6.....	5 mg
• Vitamin B12.....	50 ug
• Niacin.....	20 mg
• Pantothenate.....	10 mg
• Biotin.....	100 ug
• Folic Acid.....	1.5 mg
• Choline.....	150 mg

Heat stable Vitamins added at time of manufacture.

FEEDING RECOMMENDATIONS:

Dunstan Speedfeed®

Light Work	3kg per day
Medium Work	4-5kg per day
Racing	5-6kg per day

FEEDING NOTES:

- The above recommended feeding rates are based on a 500kg horse and are guidelines only. Daily feed amounts will vary depending on pasture availability and body condition. Horses are very much individuals with different metabolic efficiencies, some require a little more, others a little less, for the same level of activity.
- Ensure adequate fibre intakes by providing 1%-1.5% per day of the horse's body weight as chaff, hay, **Dunstan Betabeet/Sugarbeet** or pasture (on a Dry Matter basis).
- It is advisable to split the daily hardfeed into at least two feeds, preferable 3-4, but feed no more than 2.5kg of **Dunstan Speedfeed** per meal.

GENERAL NOTES:

- Always ensure the horse has access to clean drinking water.
- High **Copper** levels in **Dunstan Speedfeed®** make it unsuitable for feeding to sheep.

Dunstan Horse Feeds are produced in Equine-Safe manufacturing plants. Professionally formulated for New Zealand horses performing under New Zealand conditions
